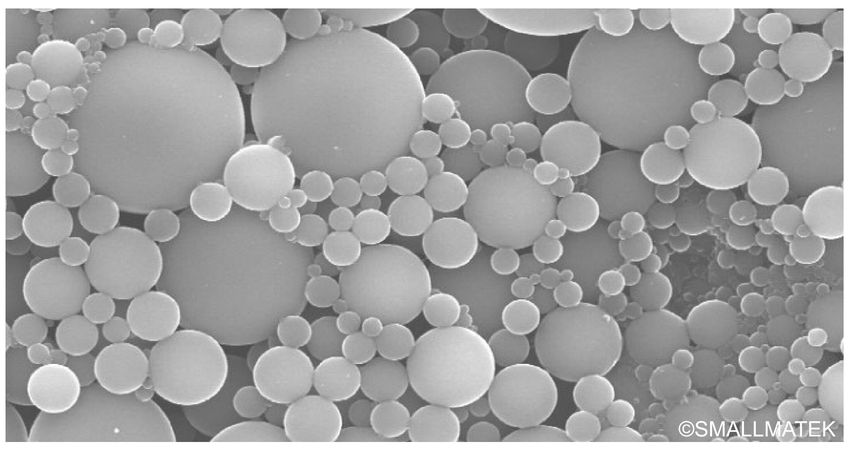
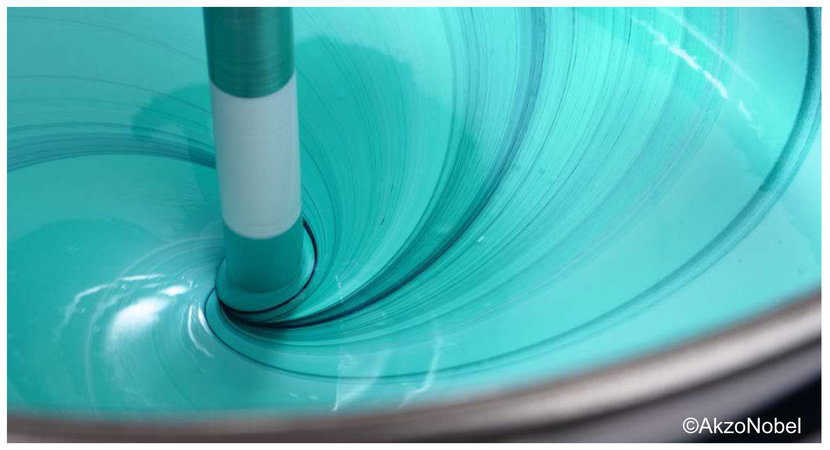
VIPCOAT

Virtual Open Innovation Platform for Active Protective Coatings Guided by Modelling and Optimization

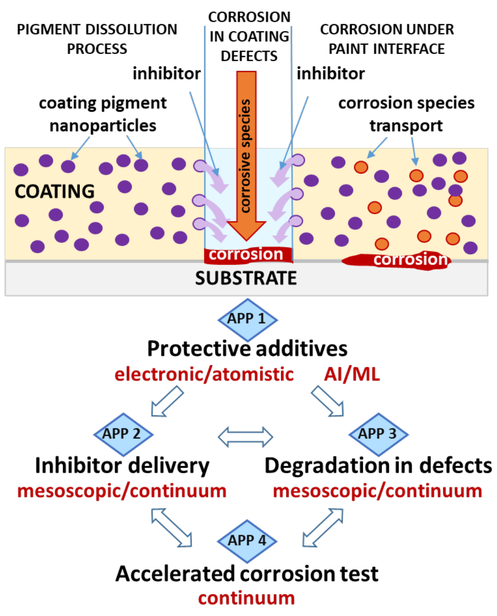




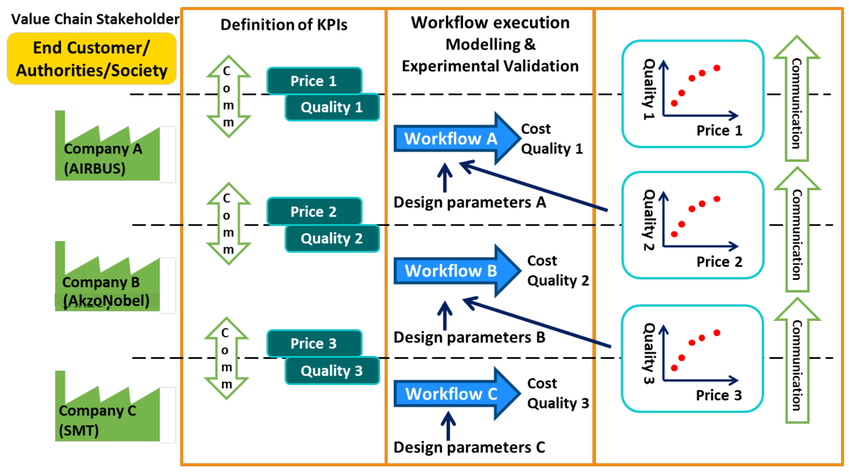
Collaborative Industrial Innovation along Production Chain of Active Protective Coatings

Data-driven and physics-based multiscale materials modelling

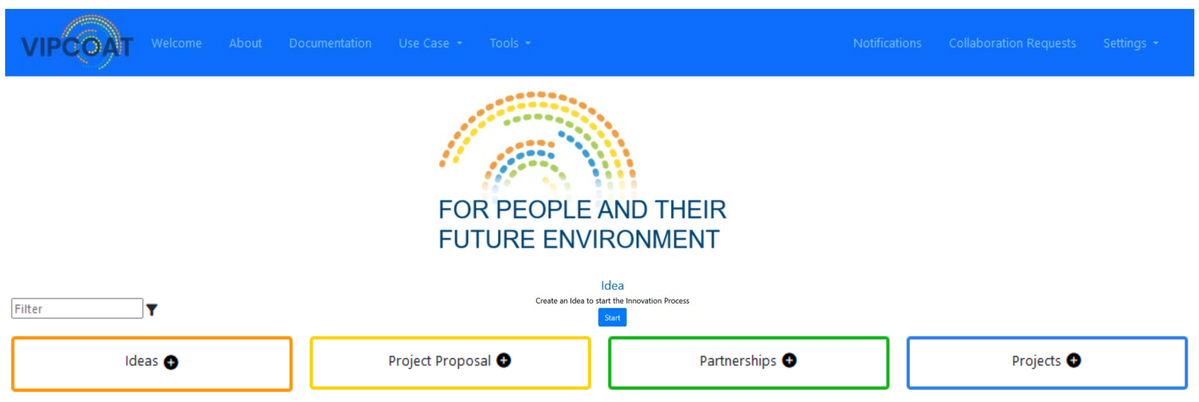
- **Ontology based Open Innovation Platform** for the development of inhibiting active protective coatings and accelerated corrosion tests for assessing their in-service durability



Decision Support System



Materials Modelling and Digitalization at B2B2B Environment



https://vipcoat-oip.com/welcome

- Develop **greener active** protective coatings based on materials modelling and optimization
- Implement **Quadruple Helix Innovation Model** to drive Open Innovation Process
- Foster **collaboration of communities** working on advanced materials design: modelling, characterisation and manufacturing

FOR PEOPLE AND THEIR FUTURE ENVIRONMENT

Project Coordinator:
Dr. Natalia Konchakova
