Abstract

IAM4EU, the new Innovative Advanced Materials for the European Union co-programmed public private partnership for funding under Horizon Europe will be presented.

The partnership will take up its work in March 2025 and will have a 250m€ budget out of the Horizon Europe budget earmarked for the topics developed under it from 2025-2027. The current state and the Strategic Research & Innovation Agenda (SRIA) of IAM4EU and how interested higher education institutions, research organisations, SMEs and larger industries can participate in the multidisciplinary network on innovative advanced materials of IAM-I will be discussed.
